

electrical engineers are contracted for this research which has commenced.

## Education

Educating the public is important and the Sharks Board offers boat trips, audio visual presentations and demonstrations. The public can go out to sea and watch the shark nets being checked in the morning. The comfortable double tiered tour boat leaves Wilson's Wharf at 6.30am and heads out to sea and joins the working craft to view the shark net experience. This two hour trip is a good experience to see Durban's beachfront in the early morning light with a skipper who provides interesting information on board.

The public and learner groups are able to visit the Sharks Board in Umhlanga where a large screen audio-visual presentation draws the audience into the world of the shark and the role of the Sharks Board. In an effort to bring science to learners and visitors, the Sharks Board has made a shark dissection part of the learning experience. **W**
